RE: Knapheide Manufacturing Company Closure Plan Amendment  
Facility Location: West Quincy, Missouri

Dear Mr. Korb:

The Missouri Department of Natural Resources (MDNR) has received and reviewed the Closure Plan Amendment dated February 8, 1995. The MDNR is unable to determine the purpose in amending the revised "Closure Plan for Waste Paint Filters and Overspray Paper Storage Unit and the Brule Incinerator Unit" that was approved with modifications on August 22, 1994.

As indicated from the previous sampling, the site has obvious areas where hazardous constituents have been identified above acceptable limits. These areas shall have the extent of contaminants defined and shall be remediated or have hazardous waste soil constituents removed to background levels to accomplish clean closure.

To determine the rate and extent of contamination, sampling shall continue in depth to a point at which the constituents of concern are equal to or less than background levels for metals and below PQLs for analyses of volatiles and semi-volatiles. The soil samples shall not be composited.

Knapheide Manufacturing Company has sixty (60) days from the date of receipt of this letter to complete the closure of the Waste Paint Filters and Overspray Paper Storage Unit and the Brule Incinerator Unit. A certification of closure shall be completed within sixty (60) days of completion of final closure activities and submitted to the MDNR.
